I am a 2nd year IT student with a specialization in business application programming. I am still looking for a path in which I would like to develop. I put my steps in frontend, backend and even in game development. I try my hand at various projects - smaller and larger ones, with different results (which you can see on github or itch.io given below). I am outgoing, cool headed and like to joke.

I am not afraid of new challenges.

SKILLS

Python Unity C++ C# Java

CSS HTML JavaScript

SQL Perl XAML

SOFT

Teamwork

Motivating others

EDUCATION

KAZIMIERZ WIELKI UNIVERSITY IN BYDGOSZCZ

Computer Science, Bachelor of Engineering
